# Thursday seminars

*Taking a Look at the Future:  
a cocktail hour event!*

## Seminars 2022 first quarter:

- 
- |                                                                                                                                     |                                         |                                          |
|-------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------|------------------------------------------|
| <b>21/04</b>                                                                                                                        | Ing. Danilo Pau<br>(STMicroelectronics) | <a href="#"><u>Registration form</u></a> |
| <b>Design and deployment of interoperable<br/>deeply quantized neural networks for in-sensor<br/>and micro-controller computing</b> |                                         |                                          |
- 
- |                                             |                                 |                                          |
|---------------------------------------------|---------------------------------|------------------------------------------|
| <b>05/05</b>                                | Dr. Roberto Ragazzoni<br>(INAF) | <a href="#"><u>Registration form</u></a> |
| <b>Ottica Adattiva per Grandi Telescopi</b> |                                 |                                          |
- 
- |                                                                                    |                                                     |                                          |
|------------------------------------------------------------------------------------|-----------------------------------------------------|------------------------------------------|
| <b>19/05</b>                                                                       | Prof. Valentina Donzella<br>(University of Warwick) | <a href="#"><u>Registration form</u></a> |
| <b>The inconvenient truth of sensor data in<br/>Assisted and Automated Driving</b> |                                                     |                                          |
- 
- |                                                                      |                                                |                                          |
|----------------------------------------------------------------------|------------------------------------------------|------------------------------------------|
| <b>09/06</b>                                                         | Prof. Stefano Giordano<br>(University of Pisa) | <a href="#"><u>Registration form</u></a> |
| <b>Networked Cyber Physical Systems for the<br/>Tactile Internet</b> |                                                |                                          |
